

Vinyl-Xperience
Record Cleaning Kit PRO
Instruction Manual

 **procare**[®]

Specifications:

Power Source: DC 12V 3A

Dimension: L330 mm x W170mm x H100mm

Weight: 1,150g

Caution:

- Refrain from rotating the cleaning arm over 90 degrees as it will break the bearing within.
- After the cleaning operation, refrain from open the cleaning arm too quickly as it may damage the delicate vinyl record.
- During cleaning operation, avoid exerting excess downward force on the vinyl record weight as it will cause damage to the rotating motor.

Note:

- After cleaning operation, dust removed from the vinyl record groove will accumulate on the carbon brush and on the vinyl record section that is in contact with the carbon brush. Recommend using velvet cleaning pad or dust blower to complete the vinyl record cleaning process.
- This product supports double sided cleaning. For deep cleaning, ensure the required side of the vinyl record is placed facing downwards.
- Recommend holding the metal end of the cleaning arm for 90 degrees opening and closing action.
- If the vinyl record is excessively warped, it is not recommended to place on the product for cleaning. Advise to use the provided velvet cleaning pad and soft tip blower to complete the vinyl record cleaning process.
- To interrupt cleaning operation, simply press the power button to stop.
- This product has built in temperature sensor to prevent overheat of the vacuum motor, therefore intensive usage may trigger the safety mode and will not be able to use deep cleaning operation for 15~20 minutes.
- To prolong the life of the vacuum motor, recommend to rest 15~20 minutes in between each deep clean operation.

Product Guide:

- 1 Power socket
- 2 Power button
- 3 Placement mat
- 4 Cleaning arm
- 5 Metal end
- 6 Carbon fiber brush & Velvet pad x2
- 7 Vinyl record weight
- 8 Dust collecting compartment

Product Accessories

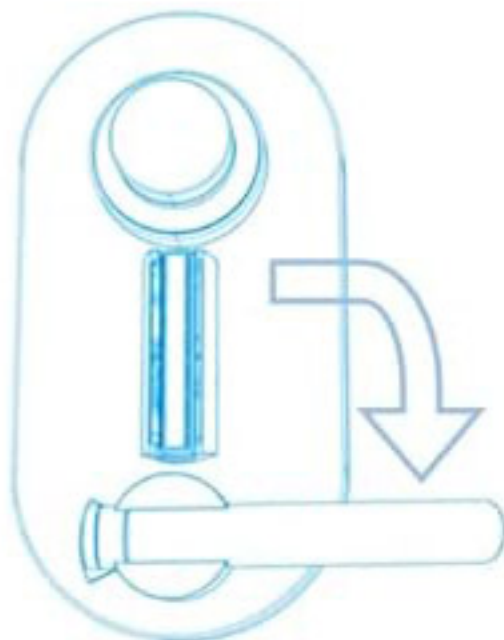

- A Power adapter
- B Mini brush
- C Velvet cleaning pad
- D Dust blower

Instruction:

Make sure the power adapter is securely plugged to the main body's power socket.

Step 1. Setup

1. Use the provided soft tip dust blower to remove large dust particles from the vinyl record.
2. Rotate cleaning arm 90 degrees clockwise to open.
3. Check and ensure top and bottom carbon fiber brush are securely attached onto the cleaning arm and main body.
4. Place vinyl record onto the placement mat, and then gently place vinyl record weight on top of the vinyl record label section.
5. Rotate cleaning arm 90 degrees anticlockwise back into position to complete setup.

Step 2. General Cleaning / Deep Cleaning

1. Press power button to begin general cleaning process. The cleaning process will last about 1 minute.
2. For deep cleaning process, press and hold the power button for 3 second to begin.
3. Once cleaning process is completed, slowly rotate cleaning arm 90 degrees clockwise to open.
4. Gently lift vinyl record weight away from vinyl record.
5. Pick up the vinyl record and use the velvet cleaning pad or soft tip dust blower to remove the excess dust.

Step 3. Maintenance

1. Use the mini brush to brush clean the carbon brush and the center velvet pad before and after each vinyl record cleaning routine.
2. Regularly open the dust collecting compartment to clean out the accumulated dust. Avoid this operation during vinyl cleaning routine.
3. Regularly detach the bottom carbon brush module and use the dust blower to clean the vacuum intake area.
